The following will give you an overview of what you can do with this template

Problem 1

Type your problm here

Personally I recommend Mathpix (https://mthpix.com/), which can easily export your ProblemBook.pdf to LATEX code.

Solution. Write your solution here.

Example of equations . x + 1 = 2. Or

$$x - 1 = 0$$

Example of list of equations.

$$x = 1$$
$$y = 2$$

Example of a matrix.

$$\begin{pmatrix} 1 & 0 \\ 0 & 1 \end{pmatrix}$$

Example of a lemma.

Lemma. *This is lemma.*

example of a proof.

Proof. Write your proof here.

Example of including a picture.

Example of refering a piece of code.

Print ("Hello World")

Example of a table

	Mean	SD
fall 2077	7.06789	1.714523
fall 2077	7.06789	1.714523

Overall, this is a quite basic template for assignments, and above are only some basic features. I included enough packages and set a few environments. You may have modify them or add features to fit your personal preference. enjoy using it!
